Subject: Carter Road

Trish,

Thank you for your call today and offer to hear the other side. I am sorry that I let my frustration out on you, but as I mentioned I have been living with all of their false claims for 3 years now and I have had it!! It is time to stop the insanity!

I think it is a huge waste of taxpayer money to send someone hear to investigate the claim of the residents on Cater Road, when PA DEP has all of the facts and many have spent huge amounts of money and time proving their claims to be false. DEP, Cabot, Penn State and many others have science to prove that the methane migration is naturally occurring in this area and regardless of drilling or not, it lays near creek beds and always has. Penn State just issued a report showing that their is no science to back up claims that drilling for gas contaminates water wells.

DEP finally did what they should have done many months ago and released Cabot from having to deliver water to these people after all of this time. The fact is that they do not have contaminated water (I have copies of the early tests done by DEP) and if it is contaminated, it has not been traced or proven that it was caused by the gas drilling. The simple truth is they are suing Cabot and as long as this goes on, they will continue to be vocal, try to gain sympathy and look for media attention. All the local residents, outside of the litigants, are tired of their lies and carrying on.

The residents of Dimock want this to stop! We want Cabot to be allowed to stop the unnecessary water deliveries, to be able to continue to drill for gas and our lives to move forward. We are all being held hostage and not allowed to have wells on our land developed due to their false accusations. I personally do not care if they want to sue Cabot , until the end of time as long as it does not interfere with the rests of our livelihoods.

This maneuver to contact your office and ask for an investigation, is just another of their ploys for sympathy and attention. They have exhausted so many avenues and when one agency figures out what they are truly all about, they then go to another and then another and so on. Eventually everyone finds them out to be liars they truly are and stops giving them the attention they want, but in the meantime, a lot of time and money is wasted.

They will not and have not allowed Cabot or the DEP to test their water for a long time. What are they afraid of?? They will not accept the settlement that they were offered They will not accept the water treatment systems they were offered and they want the citizens of PA to pay for a 12 million dollar pipeline to provide them with water!!! If the water was so bad, why are they still living here? This is all about about the almighty dollar. Please do not let them use your office to perpetuate this charade.

The facts show over and over, their claims are false and it is time to turn deaf ear to their cries of "wolf"!

If you still want my husband to speak to your team on Thursday, please call first and he will arrange to meet with them.

Thanks you for your consideration.
